# LABORATORY FUME CUPBOARD DEEP CLEANING

Routine cleaning for schools, universities and laboratories

## WHAT WE PROVIDE

- Routine cleaning of accessible internal and external surfaces
- Accessible removable baffles and panels, where safe and authorised
- Planned multi-site programmes and coordinated site access
- Photographic records, checklists and completion reporting

### RECENT PROJECT SNAPSHOT

**31** fume cupboards **6** schools **4** working days

Two operatives | Coordinated multi-site cleaning programme

## CLEAR SCOPE. CLEAR RESPONSIBILITIES.

Routine cleaning only. Excludes specialist chemical decontamination, hazardous-waste removal, ductwork cleaning, LEV examination, testing, servicing and certification.

Clients must disclose relevant hazards and confirm equipment has been assessed and made safe for the agreed cleaning activity.

# A PRACTICAL CLEANING PARTNER

## For LEV servicing and maintenance companies

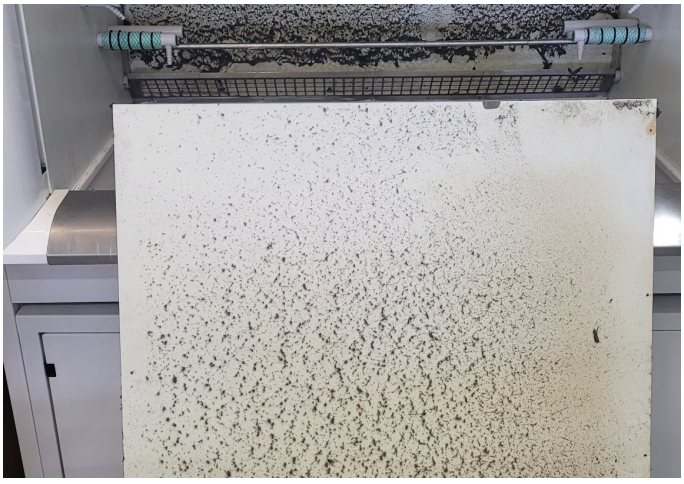

You provide the LEV testing and maintenance. We provide routine deep cleaning, complementing your services without competing for your LEV inspection or certification work.

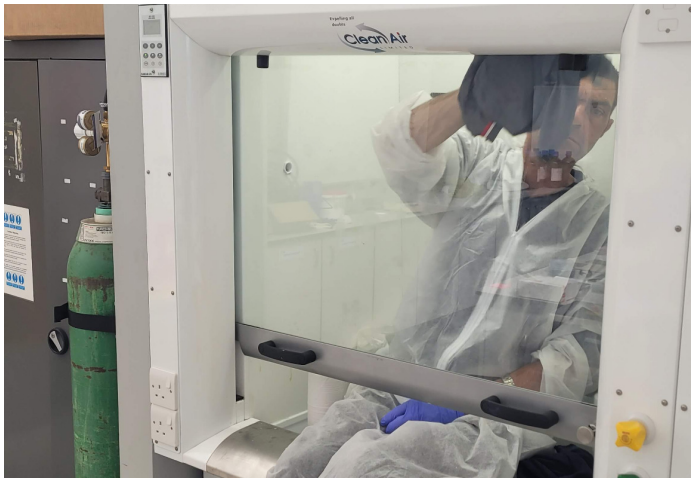

### HOW WE WORK

Agreed scope | Hazard information | Safe access | Site coordination | Completion records

## SAFETY AND WORKING ARRANGEMENTS

- Client identifies hazards and confirms the equipment is safe for cleaning
- Work is subject to a suitable risk assessment and site arrangements
- Only accessible components are cleaned where safe and authorised
- Work outside scope requires separate assessment and agreement

Actual project photographs; not a before-and-after comparison.

## WHY WORK WITH VES

- Practical experience in technical and laboratory environments
- Small, coordinated team suited to planned shutdowns and multi-site work
- Clear separation of cleaning and LEV specialist responsibilities
